

# Senan Jayasinghe

## Full Stack Developer

senandulneth1@gmail.com | +94 71 424 2312

[LinkedIn](#) | [GitHub](#) | [Portfolio](#)

---

## Professional Summary

Aspiring Full Stack Developer with experience building scalable web applications, AI powered systems, and data-driven solutions. Skilled in frontend and backend development, database design, cloud technologies, machine learning, and data analysis. Passionate about creating efficient, user focused software that solves real world problems and delivers measurable business value. Actively building end to end projects that integrate modern tech stacks and real-world system design.

---

## Technical Skills

**Languages:** Python, R, Java, TypeScript, Nodejs, C#, C++

**Full Stack :** Spring Boot, .NET, MERN, Redux TK, FastAPI, RESTAPI, WebSockets

**AI & ML:** TensorFlow, PyTorch, Scikit-learn, Hugging Face, LangChain, LangGraph, RAG Pipelines, Vector Search

**Data & NLP:** NumPy, Pandas, Matplotlib, NLTK, TF-IDF, OpenCV, PyAudio

**Database:** SQL, MongoDB, PostgreSQL, SQLite, Oracle DB, ChromaDB, Qdrant

**Tools:** GitHub, Git, Jupyter Notebook, Docker, Power BI, CI/CD, AWS, Azure, VS Code, Visual Studio, Postman, SSMS, Zapier, n8n, Excel

---

## Professional Skills

- Agile teamwork
- Problem Solving
- Time management under deadline
- Business Process Analysis
- Critical Thinking
- Strong Communication skills
- Adaptability and flexibility
- Research & Knowledge Sharing

---

## Education

- BSc (Hons) in Information Technology Specializing in Data Science (UG) | Nov 2023 – 2027
  - Sri Lanka Institute of Information Technology (SLIIT) | CGPA: 3.30 / 4.00
- G.C.E. Advance Level 2022 (Science Stream)
  - Sivali Central College Ratnapura - 3 | Passed With 2 S 's and a C

---

## Professional Experience

**Project Third eye Trading:** Worked with a client via Upwork, primarily handling C# backend development, including real-time communication using SignalR and WebSockets, resulting in a 30% improvement in live data updates, Coordinated with a React.js frontend.

## Projects

### **Snazzy – E-Commerce Platform with AI Chat Support (MERN, Stripe, Groq, JWT) - [GitHub](#)**

Built a full-stack e-commerce platform with secure authentication, product management, advanced filtering, and Stripe-powered payments. Implemented an AI-powered customer support chatbot using Groq, along with an admin dashboard for managing products, orders, users, and promotions.

### **Library Management System (.NET, SQLite, React, TypeScript, JWT, Stripe) - [GitHub](#)**

Built a system with Role-based JWT auth, QR-based member verification, and Stripe payments. Handles books, members, reservations, loans, returns, and fines with automated expiry and fine calculation. Designed a scalable layered architecture with transaction tracking for maintainable, efficient operations.

### **Opus – Campus Management System (Spring Boot, OAuth2, PostgreSQL, React, WebSocket) - [GitHub](#)**

Built a full-stack campus operations platform to manage resource bookings, maintenance tickets, user roles, and real-time notifications. Implemented secure authentication, admin approval workflows, booking conflict handling, and a responsive React frontend connected to a Spring Boot REST API.

### **Face Recognition Attendance System (Python, OpenCV, Face Recognition, NumPy) - [GitHub](#)**

Built a face recognition system that identifies people from images or camera input using face embeddings and a KNN classifier. The system detects and processes faces, compares them against stored records, and supports real-time recognition for attendance tracking, access control, and identity verification.

### **Pharmacy Sales Data Warehouse & BI Solution (SQL Server, SSIS, SSAS, Power BI, Excel, ETL) - [GitHub](#)**

Designed a pharmacy sales data warehouse to organize sales data for reporting and analysis. Built ETL workflows, cleaned and validated data, created analytical models, and developed Power BI dashboards. Used Excel for data preparation, analysis, and reporting.

### **Arfy AI – Personal Voice Assistant (Python, PyTorch, LangChain, LangGraph, Qdrant, RAG, faster-whisper, PyQt6, OpenGL) - [GitHub](#)**

Built an AI-powered voice assistant that understands user commands and performs tasks such as web search, weather updates, app control, and media actions. Integrated LLMs, RAG, and AI agent workflows to make responses more contextual and useful.

---

## Certifications

- AI & ML SLIIT
  - MongoDB Data Modeling Path
  - Introduction to LangGraph - Python
- 

## Extra Curriculum

- National Level Chess Player
  - Singer & Instrumentalist
-
